

## Head of Infrastructure and Security

Dear HR Manager,

I am writing to express my strong interest in the Head of Infrastructure and Security position. With over 24 years of progressive international experience, including extensive service as a CIO/Transformation Manager, I offer a robust track record in strategically leading, governing, and securing complex, multi-regional technology environments across Europe, Africa, and APAC. This experience is perfectly aligned with your requirement to ensure the high availability, integrity, and security of all technology systems.

My qualifications directly match the core responsibilities of this role. As the CIO Infrastructure & Telecom / CISO/DPO at AXA France and later as a CIO/Transformation Manager at Allianz Technology, my mandates included the strategic and operational management of networks, security, and infrastructure.

Key achievements that demonstrate my fit include:

- *Infrastructure & Availability:* I have extensive experience in ensuring high availability, including deploying dual-redundancy SD-WAN/MPLS networks and managing data-center migrations (Paris & Frankfurt) with regulatory compliance. At Canalsat, I built and secured a 24/7 IT support operation and ensured BCP readiness for large support teams.
- *Cybersecurity & Compliance:* My profile is underpinned by a deep commitment to security posture. I possess proficiency in CISSP practices and have driven organizational certifications, including achieving ISO 27001 and ISO 9001. Furthermore, I have successfully implemented stringent compliance controls, including GDPR and CNIL, across Europe and APAC regions, and led vulnerability remediation initiatives.
- *Cloud Leadership:* I led application transformation, standardization, and cloud migration across 17+ critical business systems at Allianz, overseeing the deployment of new 24/7 supported cloud platforms and managing environments like Azure, Google Cloud, and O365. This experience is vital for leading your cloud adoption, optimization, and secure hybrid environments.
- *Team Leadership & Management:* I have a proven ability to lead and mentor high-performing teams, having managed and scaled large-scale human capital (up to 300 IT staff across India and Thailand) and built specialized teams of managers, network engineers, and system admins. My focus is on fostering a culture of accountability and service excellence, driving skill development and performance management.

I am confident that my deep background in managing high-stakes, mission-critical infrastructure, coupled with my comprehensive knowledge of enterprise IT governance, makes me the ideal candidate to serve as PhoenixBev's Head of Infrastructure and Security.

Thank you for the opportunity to present my qualifications. I look forward to discussing how my experience can immediately contribute to strengthening your IT infrastructure and enhancing your cybersecurity posture.

Sincerely,

Jimmy Mungur
