

Application for Manager Projects

Dear HR Manager,

I am writing to express my enthusiastic interest in the Manager Projects position at PhoenixBev. With over 24 years of local & international experience—including senior roles as Project Manager, CIO, Transformation Manager, and Digital Strategy Leader—I possess the profound expertise in technology governance, large-scale project portfolio management, and cross-functional leadership necessary to ensure the successful delivery of your ERP, CRM, Infrastructure, Data, and Cybersecurity initiatives.

My career trajectory, most recently as Head of Applications & Transformation at Allianz Technology, has been defined by the successful oversight and execution of complex, multi-regional technology roadmaps. I have demonstrable experience owning and evolving comprehensive governance frameworks, having led application transformation and standardization across 17+ critical business systems, encompassing cloud migration, GDPR compliance, and decommissioning legacy infrastructure. Crucially, I have consistently managed major operational and transformation budgets (reaching €123M) while improving performance—a testament to my advanced financial budgeting and risk management abilities.

The mandate to own and evolve the Technology Project Governance Framework and lead end-to-end delivery across varied technology domains aligns precisely with my core competencies. Throughout my tenure, I have driven disciplined delivery practices, successfully transitioning teams from Waterfall to Agile/hybrid models, implementing ITIL service operations, and establishing multi-country IT Delivery Factories. My experience with enterprise-level platforms is extensive, including deep proficiency in ERP/CRM systems like SAP, Zoho, and Salesforce, as well as Cloud Infrastructure (Azure, Google Cloud), directly correlating with your project portfolio.

Furthermore, I recognize that the success of any technology project is inextricably linked to robust Change Management. My experience leading enterprise-wide communications for change and talent upskilling, coupled with a deep understanding of IT governance (ISO 27001, GDPR, CNIL), ensures that I can effectively coordinate project milestones with adoption plans and manage risks related to user readiness.

I am eager to leverage my track record of leading high-performing teams, managing third-party vendors and integrators—including leading vendor selection and contract negotiations—and ensuring technology alignment with senior leadership's strategic priorities, to drive exceptional results for PhoenixBev.

Thank you for considering my application. I look forward to the opportunity to discuss how my proven ability to lead structured decision-making and navigate ambiguity can immediately contribute to your continued success.

Sincerely,

Jimmy Mungur
