

PROFILE

Accomplished professional with more than 8 years of working experience as a software developer. A notable record of web applications projects achieved including business requirement gathering and solution brainstorming to improve efficiency, implementation of optimized/robust applications, investigate and fixing bugs, process automation and provide technical advice.

My role also involves leading key projects, such as bulk payment implementations (MUR & FCY) and mobile app development (POP), while ensuring clear communication between teams and stakeholders. With a focus on delivering high-quality solutions.
